

ZEROFAIL is in FASHION!

September 10th 2009

Dynamite trusts ZEROFAIL to host and manage their entire IT infrastructure.

The Dynamite Group chose ZEROFAIL for their proven track record of success with other major accounts: Ice.com, the Department of National Defence of Canada, Le Château, Tribal Nova, le Cirque du Soleil & the One-Drop Foundation, Jarislowsky-Fraser, DTZ, Air Canada, etc.

Specifically, ZEROFAIL will provide hosting for their internal network and will act as their datacenter, providing redundancy and disaster recovery solutions as well as connectivity. We will also make www.dynamite.ca available 24/7 with our ZERO downtime guarantees.

Before even quoting on the project, we had done an internal analysis of their network and needs and found out they had an ideal situation to improve performance and uptime while maintaining online operations cost-effective.

To learn more how ZEROFAIL can help you with its award-winning solutions and comprehensive approach, visit www.zerofail.com or contact us at info@zerofail.com.
