

WSOP places bets on ZEROFAIL!

October 14th 2009

Harrah's bets on ZEROFAIL to host their entire IT Infrastructure for the World Series of Poker (WSOP).

Harrah's the world's largest casino promoter with Casinos like Caesar's Place, Flamingo and Paris in Las Vegas. They are also the promoters for the World Series of Poker.

Starting in October 2009, ZEROFAIL will migrate and upgrade Harrah's infrastructure on its award-winning Network and host www.WSOP.com in order to provide the best and safest environment for their servers, as well as 100% uptime through fiber optic connectivity and redundancy.

It's no mere luck if Harrah's has chosen ZEROFAIL over all competition. Building on recent successes with The One-drop foundation and the Nelson Mandela Day, ZEROFAIL will live stream the events of the WSOP this fall, as well as host the complete IT infrastructure for that division of Harrah's, with redundancy.

The World Series of Poker are betting on ZEROFAIL. **Where do you place your bets?**
